MAJOR RUST PREVENTION BREAKTHROUGH

STAINLESS STEEL KOTE

How a New Product Ends the Problem of Recurring Rust

Rust. It's a problem that won't go away. At the very least, it gives surfaces a worn, shabby and unattended appearance. Worse still, it shortens or ends the life of expensive equipment, such as urinal partitions, peeling toilet flushometers, salt spreaders, vehicle bodies, fuel tanks, snow plows, mufflers, pipes, lockers, pool equipment, bleachers, door kick plates, snow blowers, lawn mowers, cooling towers, iron railings and many, many other types of equipment. Your experience has shown you that no matter how you've treated it in the past, rust rapidly recurs.

The solution - Stainless Steel Kote - A remarkable breakthrough in rust treatment. Stainless Steel Kote is not paint, zinc or aluminum, nor is it simply a rust inhibitor. It is real stainless steel, 316 grade, in easy-to-use aerosol form. Once it is sprayed on and dries, you have a protective coating of attractive, non-rusting stainless steel that completely seals out moisture and oxygen - the main causes of rust. You have literally converted the surface to stainless steel - which does not rust. And, it's the only stainless steel product that can be painted over to accommodate your color scheme, if desired.

It is incredibly durable, able to resist acids, alkalis, salt damage, abrasion and other ravages of the natural elements. Sprayed on radiators, boilers, exhaust pipes, it withstands up to 1,200^o Fahrenheit without blistering or peeling, with a final dry coat that is non-flammable. THERE'S JUST NOTHING LIKE IT.

Additional suggested areas of use include: chlorinator room railings and equipment, shelving, vents, vent fans, boilers, furnaces, plumbing fixtures, pumps, wheels, bumpers, trailer hitches, fences, grills, water lines and feed areas, compactors, guard rails, fire hydrants, sign posts, dock areas, ladders, outdoor furniture, boxes and covers, hose bibs, chains, and storm drain covers.

Stylish roller pen delivers smooth scratch free writing. Generous ink supply outlasts standard roller ball pens. Available in Micro and Fine point.

- Metallic colored barrel
- Pigmented waterproof ink
- Stainless steel point
- Color coded end caps

PhD Ball Point Pens feature a large triangular cushioned grip for exceptional control and balance... as well as less fatigue for the highest degree of writing comfort.

PhD reduces required gripping pressure by increasing the hand to grip contact surface. Less gripping pressure means less fatigue and increased comfort and control.
